

## RECON VENEER WENGE 21DS

### DANUBE RECONSTITUTED VENEER IS

- Reconstructed timber veneer.
- Manufactured in Italy from poplar grown in agricultural plantations, and timber grown in sustained yields forest.
- Supplied in standard sheet sizes providing better yields in furniture manufacture and minimizing waste.
- Even in colour and constant in pattern. No unexpected knots, splits or discolouration. Future additions will look the same; damaged panels are more easily replaced.
- Able to produce the world finest wood without impact on our delicate forest regions.
- Available in many different colours and patterns.

### VENEER PREFIXES

**ECO** – Environmentally produced reconstructed veneer made from poplar grown in certified agricultural plantations.

**EVEN** - Environmentally produced reconstructed veneer made from ayous grown in sustained yields forest.

**EURO** - Environmentally produced reconstructed veneer made from limewood grown in managed European forest.
